PROFESSIONAL SUMMARY

Management Information Systems honors graduate with a strong foundation in the .NET ecosystem and modern web technologies (React, Node.js). Following early corporate experiences, dedicated a significant period to **R&D and independent product development**, focusing on microservices architecture and cloud-native solutions. Currently leveraging this diverse skillset to build scalable health information systems at Aurora Bilişim. Committed to developing high-performance, user-centric software solutions.

PROFESSIONAL EXPERIENCE

Aurora Bilişim | *Software Specialist July 2024 – Present | Istanbul, Turkey*

- **HIMS Development:** Actively developing comprehensive modules for the Hospital Information Management System (HIMS) using .NET, SQL, and DevExpress technologies.
- **Process Optimization:** Developed automation solutions that reduced manual workload in patient registration, laboratory, and billing processes, significantly increasing data processing speed and accuracy.
- **UX Improvements:** Enhanced user interfaces based on direct feedback from healthcare professionals, resulting in a smoother user experience.

Independent Software Developer & R&D Studies | *Full Stack Developer February 2023 – July 2024 (Focused on technical upskilling and product development during this period)*

- **Modern Web Transition:** Expanded technical expertise from a purely .NET background to a Full Stack architecture by mastering React, Node.js, and Supabase.

Omicron Bilişim Hizmetleri | *Assistant Software Specialist April 2022 – February 2023 | Istanbul, Turkey*

- **E-Commerce Infrastructure:** Built customizable and scalable e-commerce platforms using .NET and SQL, designed to handle high-traffic scenarios.

DATASURGERY Software & Consultancy | *Software Development Intern September 2021 – March 2022 | Istanbul, Turkey*

- **EdTech Solutions:** Contributed to the backend development (.NET) and database management of an educational platform used by higher education institutions.

PROJECTS

- **No Code Page (nocodepage.tech):** A modern web application built with **Node.js, Supabase, and React**, allowing users to build personal portfolios without writing code.
 - **Dormitory (Management System):** A comprehensive management panel designed for university dormitories; **currently actively used** by dormitory staff to manage daily operations.
 - **E-Commerce Simulation:** An end-to-end e-commerce simulation project developed to apply complex algorithms and clean code principles.
-

TECHNICAL SKILLS

- **Backend:** .NET Core (Upper Intermediate), C#, Entity Framework, Node.js.
 - **Frontend:** React (Project-based), JavaScript (ES6+), Angular, HTML5/CSS3.
 - **Database:** MS SQL Server (T-SQL, Stored Procedures), Supabase, Mongo
 - **Tools & Methodologies:** Agile/Scrum, Git/GitHub, Docker (Basic), Microservices Architecture (Learning Phase).
-

EDUCATION

Bandırma Onyedi Eylül University | *Management Information Systems 2019 – 2023*

- **GPA:** 3.48 / 4.00 (Graduated with Honors Degree)
-

CERTIFICATIONS

- **Object-Oriented Programming with C#** - BTK Academy
 - **Learning SQL with Applications** - BTK Academy
 - **Basic Network Technologies** - BTK Academy
-

LANGUAGES

- **English:** B2 (Upper Intermediate - Professional Proficiency)
- **German:** A2 (Elementary)
